

WHAT THE WEBSITE IS ABOUT AND ITS PURPOSE?

'Euroverse' is a platform where Eurovision and music fans, and artists unite. The service offers a unique user profile where one can rank on the scoreboard by drag and drop. Artists also have the opportunity to create their own account, which will be automatically verified. This gives the accessibility to interact with fans and vice versa.

The aim is to help the users appreciate each other's cultures and diversities through music and be more tolerant towards each other.

It is different than the official Eurovision website as it does not let you connect with other people but only to let you stay updated with latest news. Usually, fans connect by using social media groups, so this will make it easier to access this kind of service.
